

# Sharing Successes in Measuring Wellness

21<sup>st</sup> Century Community Learning Centers (21<sup>st</sup> CCLC) programs provide critical supports, interventions, and programming that support student wellness. However, evaluation and measurement of the efforts can be difficult given the variety of outcomes and methods available.

The purpose of this session is to listen, learn from each other, and share evaluation successes for measuring student wellness within out-of-school time programming across Ohio.

**What are your goals for supporting student wellness?**

**What activities do you implement?**

**How might you better measure the impact of these activities?**
